

Average weekday power consumption for appliances A, B and C

Average weekly Power consumption for appliance

Average weekly Power consumption for appliance

Average yearly power consumption for an appliance

Average yearly power consumption for an appliance

Daily activations for appliance A

The chart displays a series of red bars representing activations over a week. The y-axis is labeled 'Activations [N]' and the x-axis is labeled 'Week [h]'. The activations are highly variable, with several peaks reaching the maximum value of 10. A blue bar is present at the very beginning of the week, indicating a specific activation event.

Weekly activations for appliance A

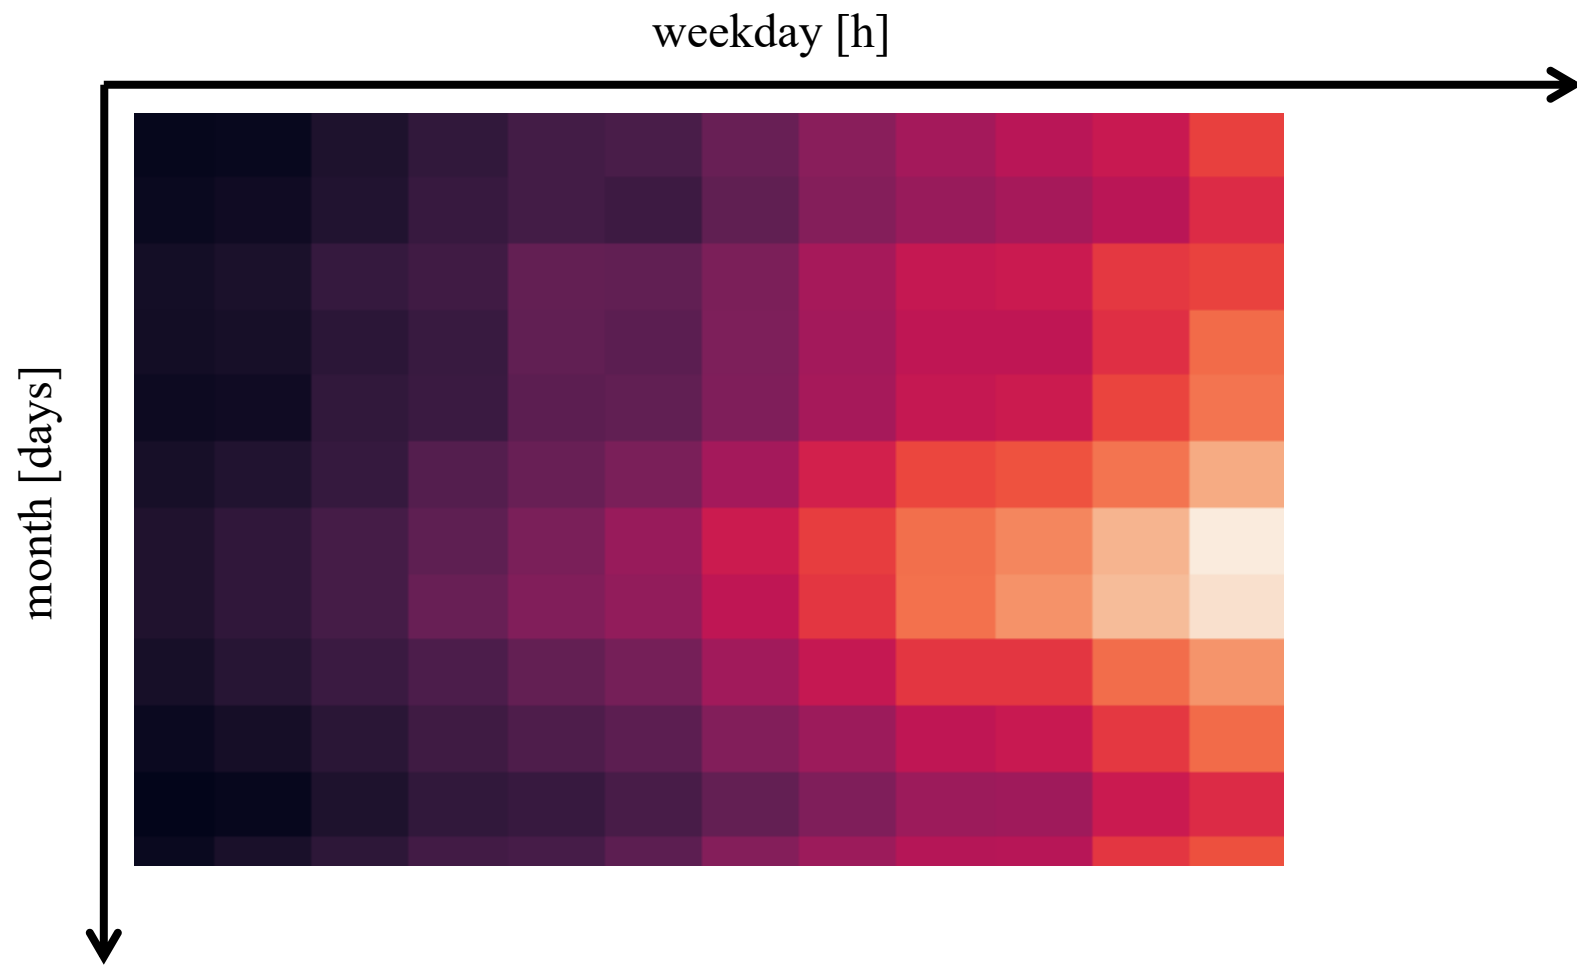

Daily Activations for appliance A and B

Number of activations / power consumption for each appliance in one month period
